

## Animals Up Close, Chapter 4

Frogs can hop. Some frogs can hop a long way. Some frogs	12
are little. Once, I saw some frogs that were very, very little!	24
Snakes are very long. Their skin has scales. When they get	35
big, they shed their old skin. They cannot bite food. They just	47
gulp it down.	50
We had to go home at the end of the day. But I was not done	66
looking at the animals. There are many animals. They can be	77
plain, have scales, have a tail, like to be cold, like to roll a ball,	92
or many more things. I want to see more animals up close!	104
